## Overstamping CLI's

WorldDialPoint will send out the Caller ID of an active Fixed Line PSTN/ISDN or Mobile Service number on calls made out through the WorldDialPoint IP Voice Network in place of the number which you have been allocated. This is known as CLI Overstamping. This service is provided on the following conditions:

1. Numbers commencing with 02,03,07 or 08 may be Over-stamped and the number must be active and able to receive/make calls.
2. You agree to authorize us to send your phone number listed above to be whitelisted with Telstra or any other carrier.
3. A Copy of the most recent invoice/bill of the number you wish to over-stamp onto a WorldDialPoint Service must be supplied. The supplied invoice/bill must be the same Account Holder as the service supplied by WorldDialPoint and that the address of the service matches the address of the current service supplied by WorldDialPoint. A Copy of the Invoice/Bill is not required should the PSTN/ISDN or Mobile service be billed by WorldDialPoint.
4. In order to maintain control over the number which is being sent out and that the Account Holder still leases/subscribes to the service number being over-stamped, the over-stamping will expire after 3 Months. To renew the Over-Stamping service, this form along with a copy of the most recent invoice/bill will need to be sent to WorldDialPoint. If your PSTN/ISDN or Mobile service is billed by WorldDialPoint, the over-stamping will only expire should you churn/port this service away or the service is cancelled.
5. WorldDialPoint can not guarantee that the over-stamped number will be displayed at all times and that this service maybe withdrawn at any time. Outbound CLI may not be displayed on International Calls or on LCR (Least Cost Route) Services.
